

- Chose from One or More of the Following Options:**
1. **Modify layout structure**
 2. **Modify border**
 3. **Modify blocks in the quilt layout**
 4. **Recolor the quilt**
 5. **Create or add a new block**

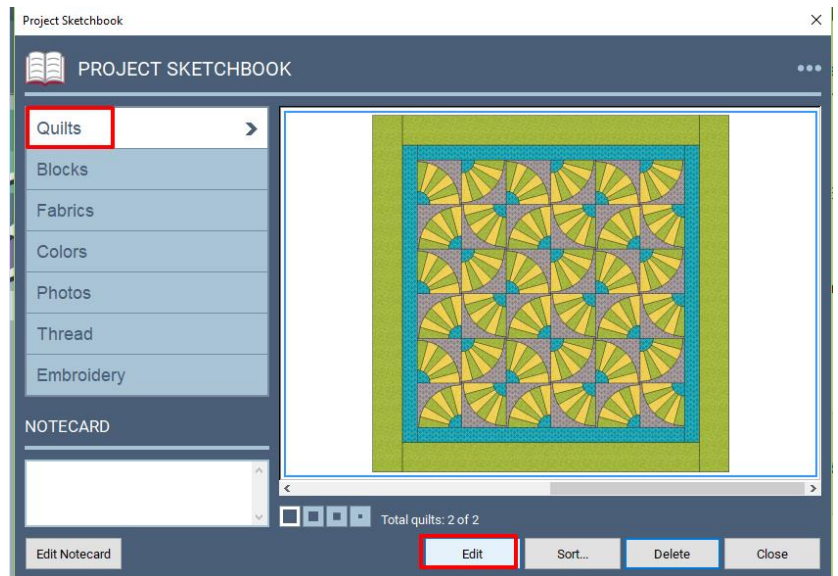

Open EQ8 and select the quilt you wish to edit.

- On the Home screen, select **Open an Existing Project**.
- Navigate to a previous project (i.e. Mix and Match Quilts using EQ8).
- Select **OK**.

- In the **Project Sketchbook**, select the **Quilts** tab. Select a quilt designed during **Mix and Match Quilts** (or a quilt of your choice).
- Select **Edit**.

Notes:

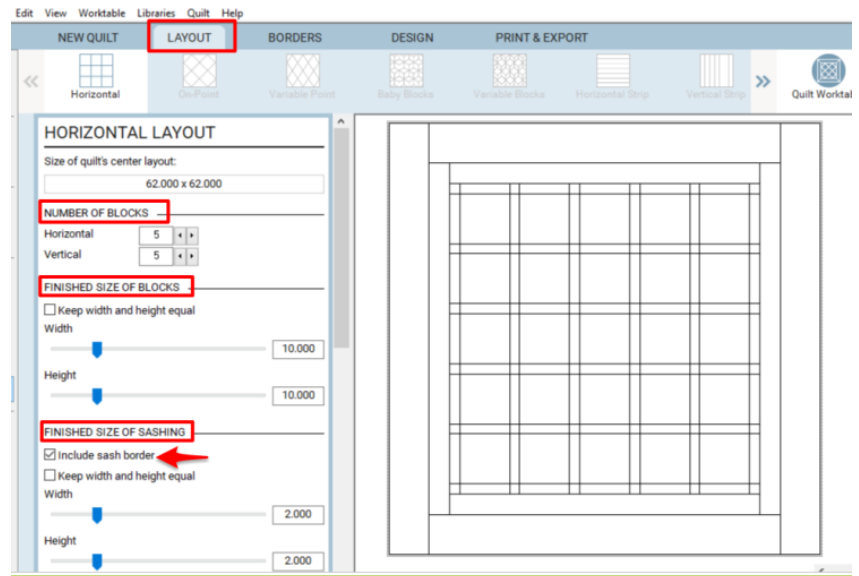

Option 1: Modify the Quilt Layout

Go to the **Layout** tab and choose from one of these simple options to modify your project:

- Change the **block size**.
- Change the **number of blocks**.
- Add or delete **sashing**.
- Change the **size of sashing**.

Kari's Tip: The options will vary somewhat based on the style of quilt selected.

- When working in custom set, you can only change the overall size of the center of your quilt.
- To change styles you must select a new quilt.

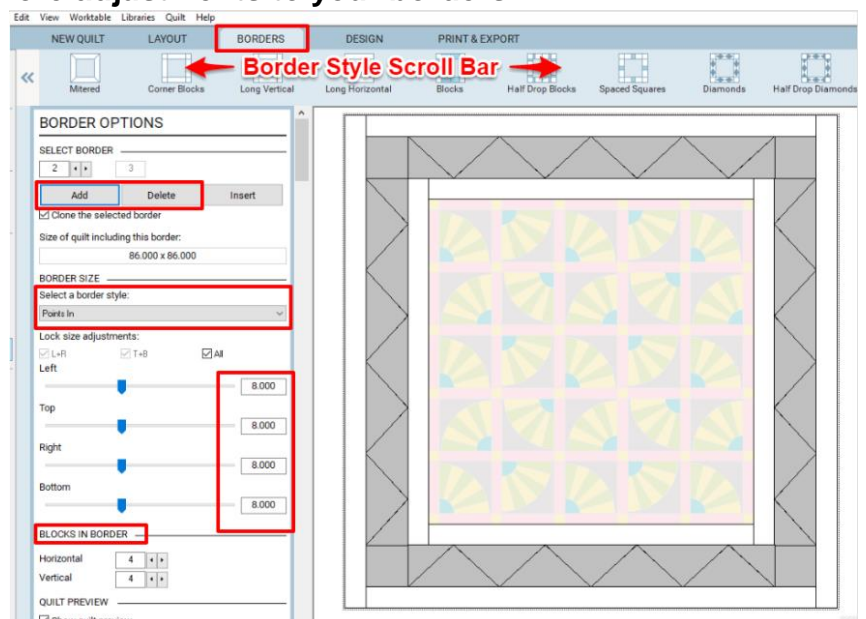

- Go to **Design** tab to get a quick peak of what your adjusted quilt is looking like.

Notes:

Option 2: Modify Borders

Go to the **Border** tab and make one or more adjustments to your borders.

- **Add** or **Delete** a border.
- Change the **size of the border** (note that each side can have a different size – and 0 is a size option as well)
- Change the border style by replacing a simple border with a more complex border design – there are lots to choose from. Select the Border style from drop down or Border style scroll bar.
- If the border contains blocks, increase or decrease the number of blocks.

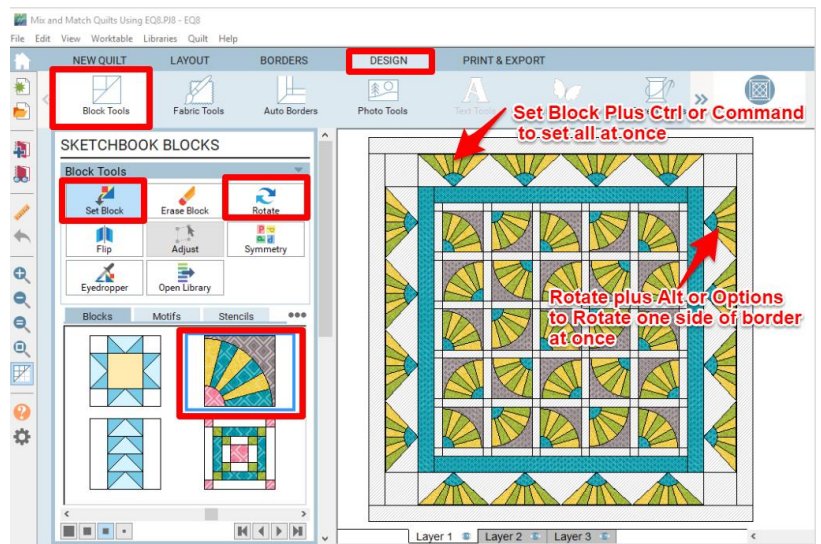

Notes:

Kari's Tip: To adjust the size of your quilt, change one or more of the following:

1. Change size of blocks
2. Change number of blocks
3. Add, delete or change size of sashing
4. Add, delete or change size of borders

Option 3: Modify Blocks in the Quilt Layout

- Select the **Design** tab.
- Select **Block Tools**.
- Select **Set Block** and select a new block and click on a space in the worktable to swap out blocks with other blocks.
 - Use the **Command** (MAC) or **Ctrl** (PC) key on your keyboard when clicking on the block space to speed up the process.
- Select **Set Block** and populate alternate block spaces with a different block.
 - Use the **Options** (MAC) or **Alt** (PC) key on your keyboard when clicking on the block space to speed up the process.
- Select **Set Block** and select a block and a space in the border to populate border spaces with blocks.
- **Rotate** blocks.
 - Use the **Options** (MAC) or **Alt** (PC) key on your keyboard when clicking on the one of the border blocks to rotate blocks in one side of a border at once.

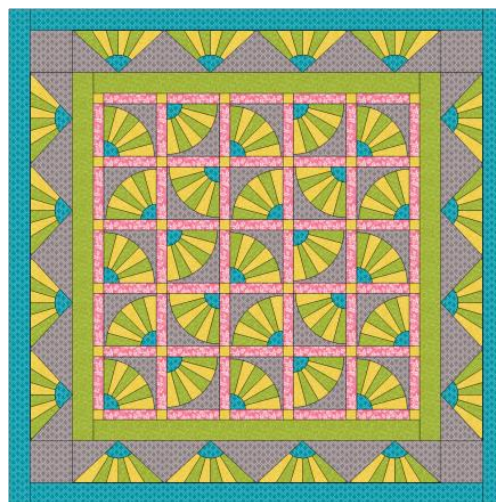

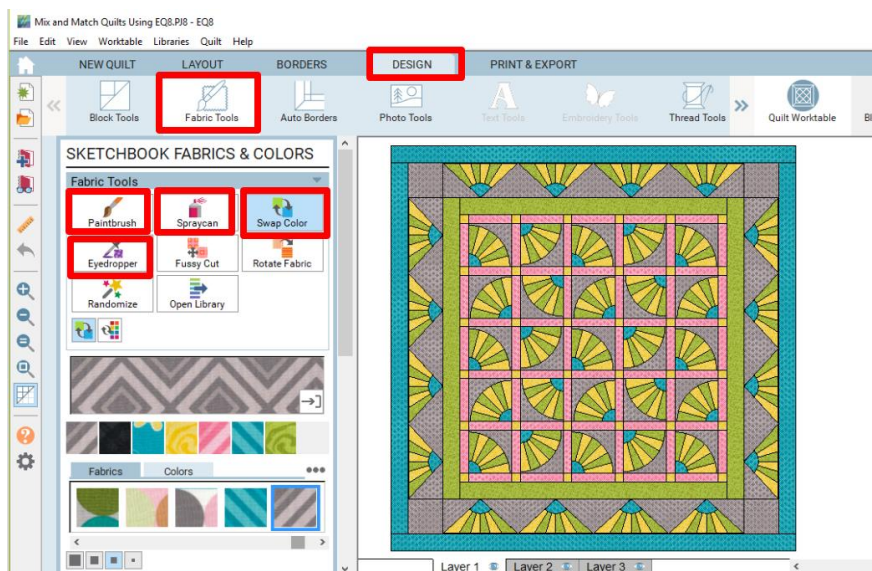

Notes:

Option 4: Recolor your quilt

- Select **Fabric Tools** to color any additional spaces in the quilt.
- If you need additional fabrics, select **Open Library** and select and add additional fabrics to your project.
- Use the following tools for coloring:
 - **Paintbrush** – Click on a patch in the quilt to color it with the selected fabric.
 - **Spraycan** – Click on a patch in the quilt to color all matching fabrics **in the block** at time.
 - **Swap Color** – Click on a patch in the quilt to color all matching fabrics **in the quilt** at one time.
 - **Eyedropper** – Click on a patch in the quilt to quickly find the fabric or color used in the palette.
- **HINT:** Use **Speed Keys** to speed up your coloring process:
- **Ctrl + click (Windows) Command + click (MAC)**
 - When the **same block** is used multiple times in a quilt, using this with the **Paintbrush** will color the same patch in all of those blocks at once. You can select either a block in the center of the quilt or a border space.
 - When the same fabric is used multiple times in a quilt, holding this speed key with the **Spraycan** while clicking will color the matching fabric in all the blocks at once.
- **Alt + click (Windows) or Options + click (MAC)**
 - When using with the **Paintbrush**, this will color similar patches in alternate blocks at once or patches in one side of a border.
 - When using with the **Spraycan**, this will recolor all matching fabric in alternate blocks at once.
- If you make a mistake, the **Undo** tool can be useful to forget one or more recent steps.
- **Add to Project Sketchbook.**

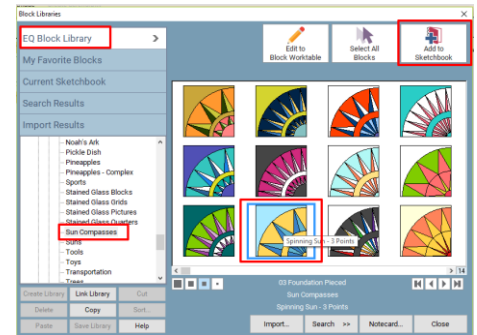

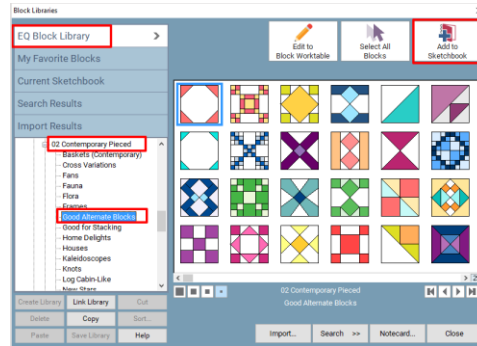

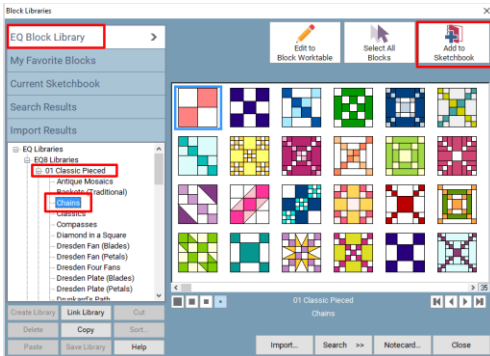

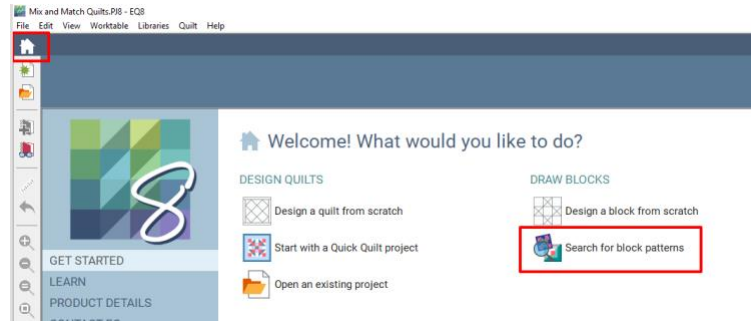

Notes:

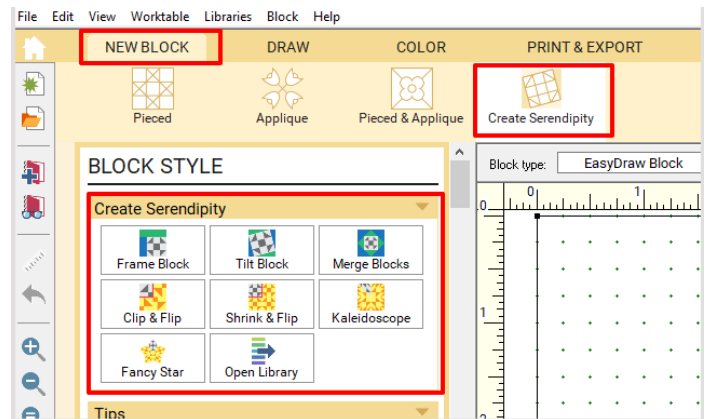

Variation 1

Option 5: Create or Add a New Block

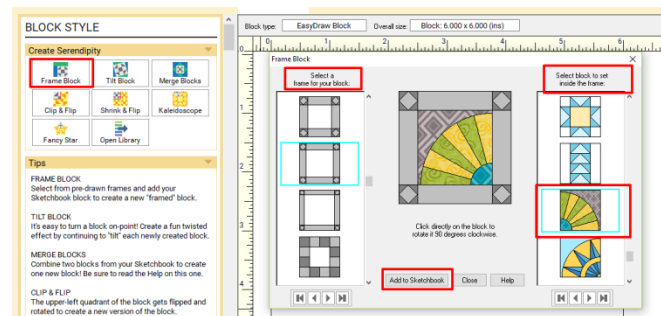

- On the **Home** screen, select **Search for Block Patterns**. In the Block library add a second block to use in your quilt. Good choices include:
 - Chains** under **01 Classic Pieced**
 - Good Alternate Blocks** under **02 Contemporary Pieced**
 - A block designed with the same basic structure (for example 2 different blocks designed based on a 9-patch grid)

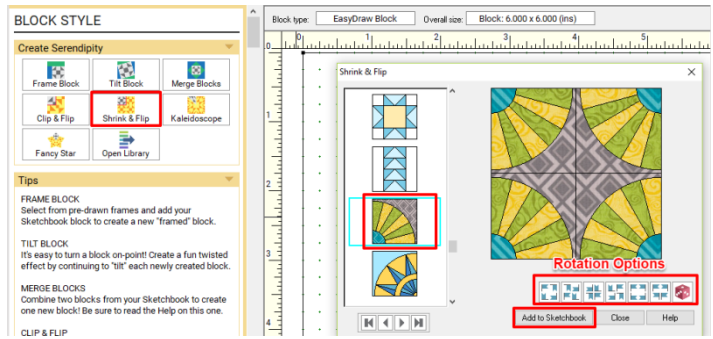

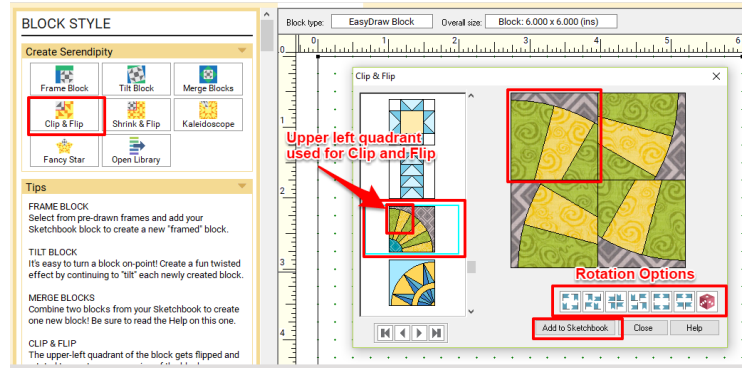

- Go to the **Block Worktable** and create a quick block from a current block using **Serendipity**. Select **New Block>Create Serendipity**. Then select from one of the Serendipity block styles.

- My favorite Serendipity blocks include:
 - Frame block**
 - Select **Frame block**.
 - Select a frame on the left side of the dialogue box.
 - Select a block on the right side.
 - Select **Add to Sketchbook**.

- **Clip and flip**
 - Select **Clip and Flip**.
 - Select a block on the left side of the dialogue box. This option will create new blocks based on the upper left quadrant of a block.
 - Select from the rotation options.
 - Select **Add to Sketchbook**.
- **Shrink and Flip**
 - Select **Shrink and Flip**.
 - Select a block on the left side of the dialogue box. This option will create new blocks by duplicating the block and adding them to a four patch layout.
 - Select from the rotation options.
 - Select **Add to Sketchbook**.

Notes:

Putting the Concepts into Practice

Variation 2

Creative Touch 1

- Delete sashing (change size to 0 x 0)

Creative Touch 2

- Change border 2 style to **Blocks**, and number of blocks to **8 x 8**

Creative Touch 3

- Using **Block Tools**, **Set Block**, set **Clip and Flip Fan** block using **Alt** or **Options** key in block center.
- Set **Uneven Cross X** in alternate block using **Alt** or **Option** key.

Creative Touch 4

- Using **Set Block** add a block to border #2.
- Use **Rotate** to rotate the border blocks around the quilt.

Creative Touch 5

- Recolor quilt.

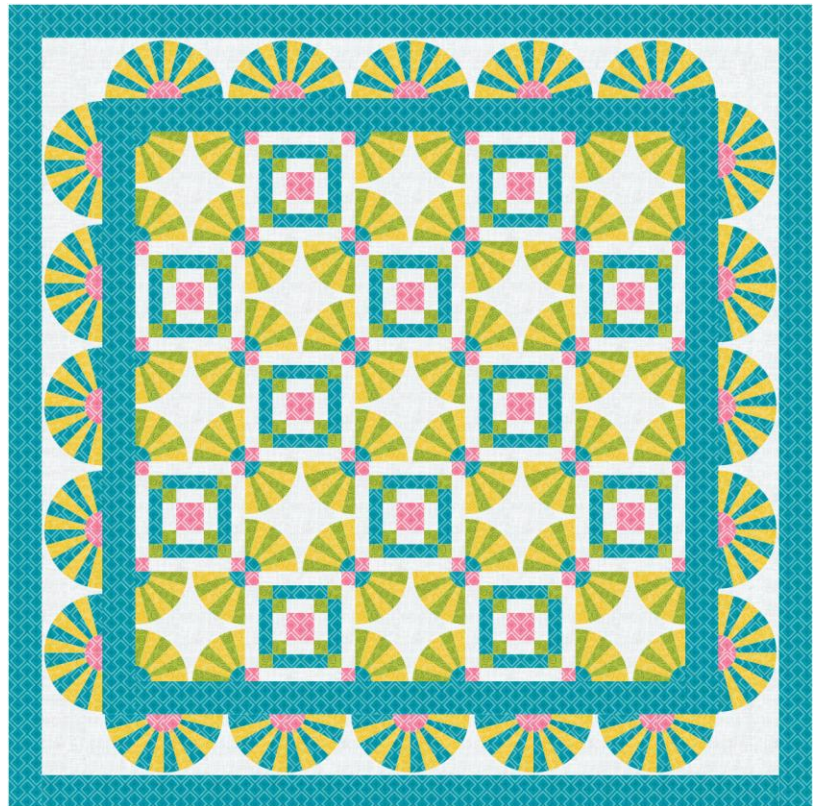

Variation 3

Creative Touch 1

- Using **Block Tools**, **Set Block**, set Shrink and Flip Fan block using **Alt** or **Options** key in block.
- Set Alabama Variation in alternate block using **Alt** or **Options** key

Creative Touch 2

- Recolor quilt.

Variation 4

Creative Touch 1

- Change Border #2 style to **Tile On-Point**. Change **number of blocks** to 6.

Creative Touch 2

- Using **Block Tools**, **Set Block**, set Framed Fan block using **Ctrl** or **Command** key in block.

Creative Touch 3

- Use **Symmetry** to rotate center blocks.

Creative Touch 4

- Using **Block Tools**, **Set Block**, set the fan in the On Point Border Blocks.
- **Rotate** blocks.

Creative Touch 5

- Use the **Alt** or **Options** key to color the alternate fan blocks frame different colors.
- Recolor remainder of quilt.
